

Activity B: Logic Model Scramble

Purpose: To master an understanding of the elements of the logic model.

Instructions: The following 36 items are each elements of a program evaluation logic model for a center for youth and community development which is focused on the prevention of violence. Its strategies involve programs for youth, family and building community support for youth. It is located in a rural community and is well regarded by the community leaders. Review each item and determine whether it is a resource, activity, output, outcome or goal. Write the appropriate label next to each item in the space provided. Note: some items may seem like they could fit in more than one area. Consider the purpose and context of the program when determining the best fit for the logic model categories. Answers are listed on page numbers 109-110.
